Prometheus Computing Llc.

This small Maryland based company keeps turning up I connection to wide spread voter fraud, with connections to, NIST, Wisconsin Election Commission and many more.

Better Business Bureau 👍
A small computer repair company 👍

From there own website 👍

I always support people working hard and building something positive!👍👍

Let's meet the "economically disadvantaged woman" who owns Prometheus Computing Llc in Maryland 👍
🤔🤔🤔🤔🤔🤔🤔🤔🤔🤔

Now that's a bit puzzling 🤔🤔
He doesn't look like a woman from Baltimore it looks like a guy from Canada 🤔
And by his own description his company is a computer repair service 🤔🤔

Without doxing his employees, he is in Canada his employees are connected to China and France with at least two of them engineers at NIST who still have access to the supercomputer in Ohio 🤔🤔🤔
osc.edu/partners/nist

I don't want the docs the individual employees, but if you go to the link below and to their LinkedIn pages they very energetically brag about "voting" and 5G computer systems. But the company itself only talks about computer repairs 🤔🤔🤔🤔🤔puzzling🤔

prometheuscomputing.com

linkedin.com/company/promet...

12/ One of the best things out of @ericries's Lean Startup is the concept of "vanity metrics" - unimportant, inflated metrics that don't have much to do with business value. But the effects of using them are different when you're a startup versus a big co.

13/ For big, established companies, focusing on vanity metrics is silly but not harmful. Everyone's thrown up a huge number to celebrate for an offsite. I get it. But for startups who are pre-product/market fit, it can lead down a path towards

I would like to tell you a story. The title of the story is, "How To Steal an Election in Maryland". The villain in this story decided that he was the most important person in the world, and although he was responsible for an entire state, he abused his position,

re-wrote laws, changed policies, by exploiting people's fears over covid-19. All so that he could manipulate an election and gain the support he needed to run for president. I will call this villain Harry Logan 🤔

The MSM doesn't want to face the election fraud . Trump won without question. But there is a very uncomfortable truth that the media is hiding and pretends not to notice. For this 2020 presidential election the "fix was in". The big name power brokers had everything set up.

They had the computers, algorithms, total control of overseas operations. They had control of many different states and the local governments within . They did everything they could to steal this election using technology.

Everyone is focused and wondering about Scytl and the raid that took place in Germany. Let's look a little closer to home shall we? I'd like you to meet Marc Fratello. The Deal Maker.

John @Johnheretohelp

13 Nov

At what point does the "Biden Crime Spree", otherwise known as his "campaign" become a criminal matter? There was no campaigning, daily lids, no questions, only the bare

I'm hearing that Biden knows he didn't win and he's pissed that "they went to far, they didn't Nuance' the votes, they panicked and went overboard with their fraud." He's being pushed into the "Pres Elect" role, and it's already bit them in the ass with McCabe being

Fully exposed. Kamala is running the show now, pushing constantly. While joe is pissed it's all going to be dumped in his lap when Trump is confirmed. They are all guilty, they are already mentally positioning themselves to manage the

I have been working with several groups over the past few months, especially over the last few weeks, trying to protect the election or document and brace ourselves for what could happen. These groups encompass people from every level and many departments of government

They have very kindly listened to and poured over everything I provided as well as vetting me along the way. We have had very serious discussions especially after this last week and what occurred, and is occurring, as a result of the 2020
